BROWSER – IMPORTANT INFORMATION

The preferred browser is Google Chrome for stability and security. ScriptSure was specifically designed using Material Design, which is a Google code set. Google Chrome can be downloaded here:

<https://www.google.com/chrome/>. Scriptsure is not compatible with Internet Explorer (IE) as Microsoft no longer provides security updates or technical support for IE. Google Chrome, Apples Safari and FireFox compatible, but Google Chrome and Apple Safari are the preferred browser choices. (Edge is also not a compatible browser).

DEFINITIONS

1. Electronic prescription: an electronic prescription message sent, for either a new or refill medication, directly to a pharmacy. These message are sent over the secure SureScripts network.
2. SIG: the instructions for a prescription.
3. Refills: the number of refills indicated on a prescription (for pharmacy use).
4. Refill Request: An electronic message received from a pharmacy requesting a refill or update to a prescription.
5. Eligibility: information related to a patient's prescription drug benefit coverage.
6. Formulary: indicated the coverage for a medication under a patient's insurance or health plan
7. Drug History Download (medication history): list of medications that a patient has been prescribed in the previous 18 months. ScriptSure shows this information, which may be incomplete, from the patient's health plan, PBM, or pharmacy. (Do not rely on this list as a complete list; always verify with the patient).

INTRODUCTION

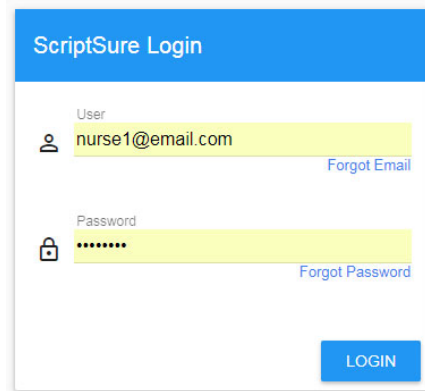

Welcome to the ScriptSure Cloud ERX application. This document is designed to provide a brief introduction on the use of the application – it is not a comprehensive feature explanation. A full help menu is available here: [Help Menu](#). There are two types of users of this application. Those that use ScriptSure as a stand-alone and those that use the application as a module integrated into their EHR system. Slight variations in launch, login to the application and screen views exist depending on which type of user you are.

LAUNCHING SCRIPTSURE

To begin using the application, navigate to www.ScriptSure.com and click the login link at the top right, or go to this site: <https://us.scriptsure.com/#/login>. If your ScriptSure Cloud ERX application is provided to you by your EHR, simply click the prescribe or launch ScriptSure button in the EHR and the automatic Single Sign-On process will both launch ScriptSure and log you in.

LOGIN WINDOW

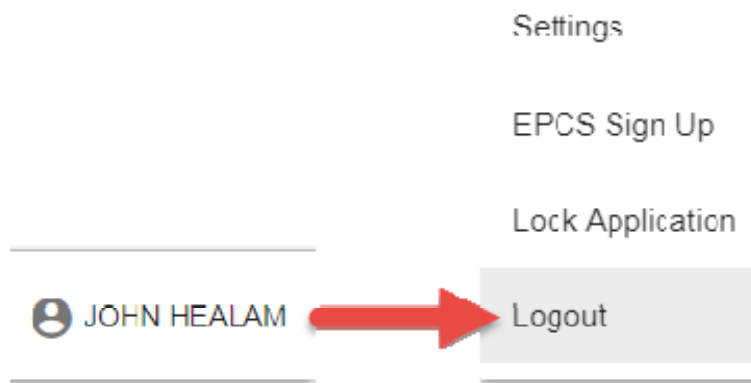

To login, each user must enter a User Name and password, unless your EHR system launches and accesses ScriptSure directly, in which case you are enrolled in single sign-on and do not have to enter this information on each login to the application. This username and login is provided by your system administrator or EHR system. Your username is always an E-Mail address.

The image shows a 'ScriptSure Login' window. It has a blue header with the text 'ScriptSure Login'. Below the header, there are two input fields. The first is labeled 'User' and contains the text 'nurse1@email.com'. To the right of this field is a link that says 'Forgot Email'. The second input field is labeled 'Password' and contains a series of dots. To the right of this field is a link that says 'Forgot Password'. At the bottom right of the window is a blue button labeled 'LOGIN'.

LOGOUT

To logout of the application, you can either close the browser window or click your username that appears in the top right of the application and then click Logout:

NAVIGATING SCRIPTSURE - TOOLBAR

Appearing at the top left and extending to the right there is an informational and navigation toolbar. Below are three examples of this toolbar. Depending on the device you are using (desktop, laptop, touchscreen, iPad, smartphone, etc.) and your screen resolution, you may see one of the following toolbars. Each does the same thing, just appear differently.

Full resolution view:

Mid-resolution view:

Hand-held resolution view:

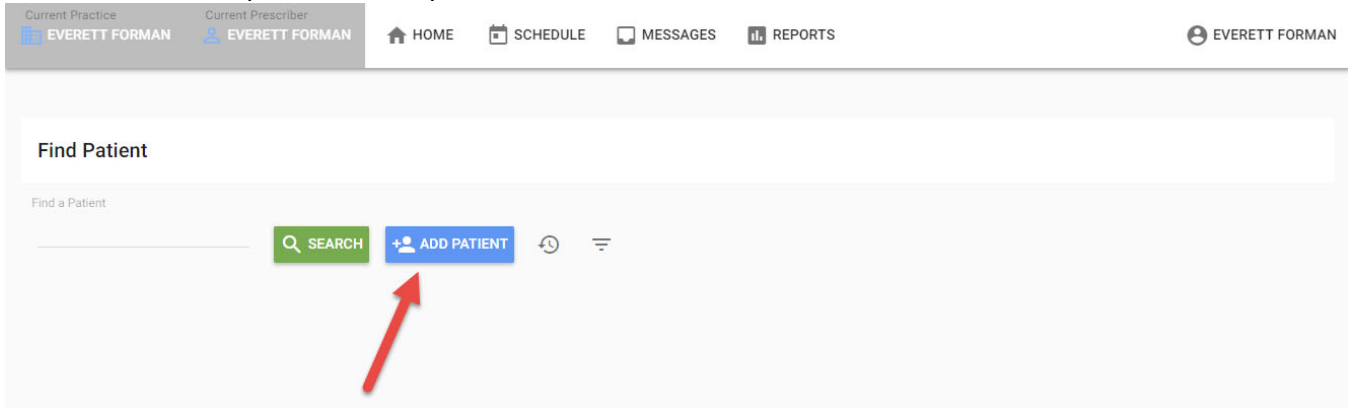

From left to right, the toolbar shows the following:

- Current practice – selected practice puts the name, address and contact information for the currently selected practice on the prescriptions and stores that for history.
- Current prescriber selected for prescription writing (this can differ from the logged in user, if the logged in user has permissions to create non-controlled prescriptions for a provider).
- Home screen button – navigates user back to Home screen in the application from any screen.
- Scheduler button – navigates user to scheduler list.
- Messages button – navigates user to messages window to handle new prescriptions, refills, electronic Prior Authorization (ePA) messages and to view history or approved and declined prescription related messages for the practice.
- Reports button – navigates user to the reports window where reports and metrics can be run for the practice, user or patient.
- Queue button – opens a drop down of all medications that have been queued, but not yet sent across the entire practice. This button does not appear if there are no items in the queue.

ADD A NEW PATIENT

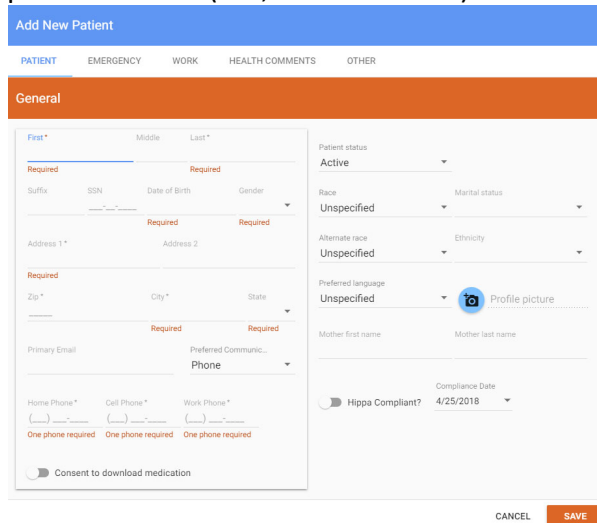

1 Click the  HOME button on the toolbar at the top of the screen.

2 To add a new patient to ScriptSure, click the  ADD PATIENT button on the Home Screen:

The screenshot shows the top navigation bar with 'Current Practice EVERETT FORMAN' and 'Current Prescriber EVERETT FORMAN'. Below this is a toolbar with 'HOME', 'SCHEDULE', 'MESSAGES', and 'REPORTS'. The 'HOME' button is highlighted. Below the toolbar is a 'Find Patient' section with a search bar and a red arrow pointing to the 'ADD PATIENT' button.

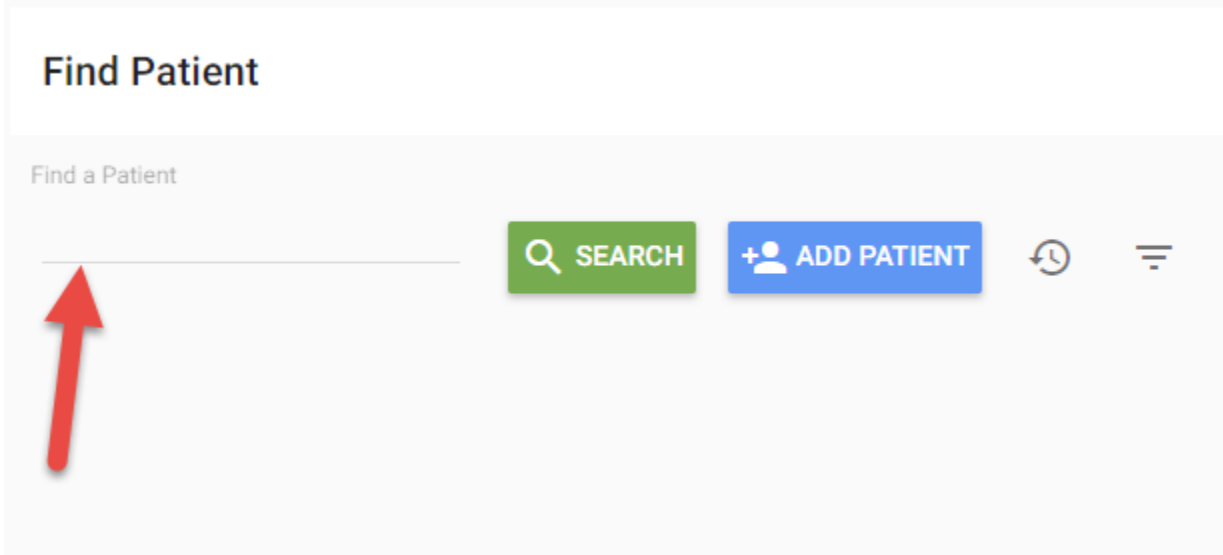

3 The Add Patient Window will open, allowing you to enter the new patient's information in the fields. **Note:** Several fields are required to create prescriptions; first name, last name, DOB, gender, ZIP, address and atleast one phone number (cell, home or work). Click Save when complete.

The 'Add New Patient' window is shown with the 'General' tab selected. The form includes fields for First, Middle, and Last names (all required), Suffix, SSN, Date of Birth, Gender, Address 1, Address 2, Zip, City, State, Primary Email, Preferred Communication (Phone), Home Phone, Cell Phone, and Work Phone (all required). It also includes fields for Patient status (Active), Race (Unspecified), Marital status, Alternate race, Ethnicity, Preferred language (Unspecified), Profile picture, Mother first name, Mother last name, Hipaa Compliant? (checked), and Compliance Date (4/25/2018). A 'Consent to download medication' checkbox is at the bottom. 'CANCEL' and 'SAVE' buttons are at the bottom right.

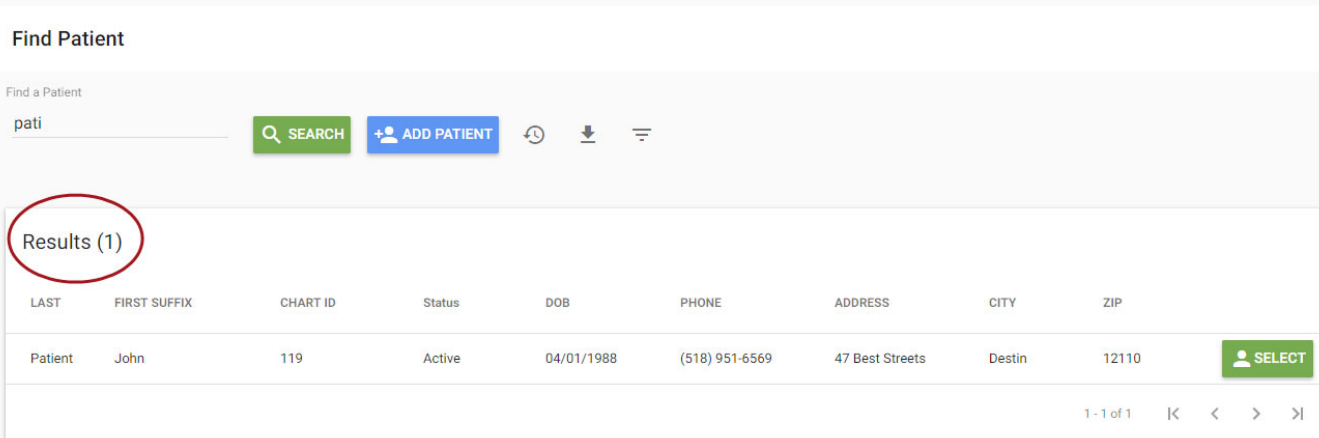

FINDING A PATIENT

1 To retrieve a patient record, begin at the Home (patient search screen). If you are not currently at the Home screen, click  **HOME** at the top of the screen. In the search box (see red arrow below) you can type a patient's last name and click  to locate that patient.

The screenshot shows the 'Find Patient' search interface. At the top, there is a title 'Find Patient' and a subtitle 'Find a Patient'. Below the subtitle is a search input field with a red arrow pointing to it. To the right of the input field are three buttons: a green 'SEARCH' button with a magnifying glass icon, a blue '+ ADD PATIENT' button with a person icon, and a circular refresh icon. To the right of the refresh icon is a hamburger menu icon.

2 Patient's that match the name entered will appear in the results area. Select the desired patient by double-left clicking on the patient row. In the example below, the search is for **Patient, John**

The screenshot shows the 'Find Patient' search results. The search input field contains 'pati'. The results table has one row for 'Patient, John'. The table columns are: LAST, FIRST SUFFIX, CHART ID, Status, DOB, PHONE, ADDRESS, CITY, ZIP. The 'Results (1)' text is circled in red. The 'SELECT' button is highlighted in green.

LAST	FIRST SUFFIX	CHART ID	Status	DOB	PHONE	ADDRESS	CITY	ZIP
Patient	John	119	Active	04/01/1988	(518) 951-6569	47 Best Streets	Destin	12110

NOTE: The  icon next to the add patient button gives you recently selected patient history.

Additional Search options: There is an **Advanced Search** button next to the search box. Click to expand it and you will see other fields to help you locate a patient.

The screenshot shows the 'Find a Patient' search bar with a 'SEARCH' button and an 'ADD PATIENT' button. A red arrow points to a menu icon next to the search bar, which has expanded to show an 'Advanced' button. Below this, the 'Advanced Search' form is displayed with fields for First Name, Last Name, Chart Number, SSN, Zip Code, Phone Number, Practice, Status, and DOB. There is also a checkbox for 'Include Removed Patients' and buttons for 'CLOSE', 'CLEAR', and 'SEARCH'.

OPEN A PATIENT CHART

- 1 Select a patient from the Home Screen  HOME.
- 2 When the patient is selected, the screen will change to the selected patients chart. You will have 2 indicators showing what patient you are working on and have currently selected. The top toolbar will show the selected patient (*Tad Dockendorf is the patient in this example*):

The screenshot shows the patient chart header. It includes a toolbar with buttons for HOME, SCHEDULE, MESSAGES, and REPORTS. Above the toolbar, there are three tabs: 'Current Practice' (COVERMYMEDS HEALTH), 'Current Prescriber' (ANGELA LIU), and 'Patient' (TAD DOCKENDORF). A red arrow points to the 'Patient' tab.

Also, there is a patient banner that will show the selected patient:

The screenshot shows the patient chart banner. It includes a toolbar with buttons for HOME, SCHEDULE, MESSAGES, REPORTS, and QUEUE. Above the toolbar, there are three tabs: 'Current Practice' (COVERMYMEDS HEALTH), 'Current Prescriber' (ANGELA LIU), and 'Patient' (TAD DOCKENDORF). A red arrow points to the 'Patient' tab. Below the toolbar, there is a patient banner for 'TAD A DOCKENDORF' with details: DOB: Jul 5, 1975 - 42 years Male - Chart Id #921. The banner also includes a 'PRESCRIBE NEW DRUG' button and a 'Find New Medication...' search bar. Below the banner, there is a table of current prescriptions.

PRESCRIBED	STATUS	FILL DATE	DRUG	QTY	REFILL	EXPIRES	PHARMACY	DOCTOR
<input type="checkbox"/>	Active	04/24/2018	Biaxin 250 mg tablet Take 1 tablet by mouth daily	22	0	05/16/2018	CVS Pharmacy # 8	Angela Liu

Click through the tabs at left side of the window to view areas of patient chart. After the Patient Chart has opened, you can enter and view dashboard, prescriptions, demographics, allergies, pharmacies, etc.

3 The Patient Chart (show below) will open initially to the Dashboard which shows the Last 6 Months of Prescriptions; (downloaded medication history for the patient appears below this medication table when available)

CHART NAVIGATION		BOB BOOKER PATIENT DOB: Apr 1, 1988 - 31 years Male - Chart Id #80559						ENCOUNTERS

Education		05/09/2019 11:54 AM		Adderall 10 mg tablet Take 1 tablet by mouth three times daily beginning on awakening Status: Active		90	0	06/08/2019	No Pharmacy - Save Only
								Page: 1 Rows per page: 5 1 - 5 of 7	

TIP: You can re-prescribe a medication from history by clicking **REPRESCRIBE** at the end of the medication row. Clicking the down-arrow next to the prescribe button will reveal two additional prescribe features that. The first is Add to Queue and the second is Show Confirmation.

- **Add to Queue** – this selects the medication to re-prescribe it and immediately places the script in the queue to send later with the same information visible on the row.
- **Show Confirmation** – this selects the medication to re-prescribe and places the user at the confirmation window (last step before sending to the pharmacy) bypassing the PREVIEW window which allows a user to make alterations to the medication. This is a useful shortcut if there are no changes to drug number, SIG or pharmacy selected.

OPEN A PATIENT CHART (Continued)

Click the **Current Prescriptions** view button to change the medication view to one of the available views:

Click to Prescribe a new drug:

View past medications prescribed for the patient here. You can re-prescribe a medication in the same format as delivered previously by clicking on the PRESCRIBE button.

Here you can view the medications for this patient that were prescribed by other providers. (A license is required for this data.) This data is retrieved from pharmacies and PBM companies that store past prescription data. This Drug History Download information

can be helpful in determining what the patient has taken or is currently taking. *Please note that this download list may not represent all medications the patient has been prescribed and includes up to 12 months of data. DISCLAIMER: Certain information may not be available or accurate in this report including items that the patient asked not be disclosed due to patient privacy concerns, over-the-counter medications, low cost prescriptions, prescriptions paid for by the patient, or non-participating sources, or errors in insurance claims information. The provider should independently verify medication history with the patient.*

FINDING A MEDICATION

There are multiple ways to find a medication. After selecting a patient, you can find a medication to prescribe by using one of the following:

PRESCRIBE NEW DRUG

Find New Medication...

1

PRESCRIBE NEW DRUG BUTTON changes the screen to the find a drug search window.

2

FIND A NEW MEDICATION at the top of the screen is a search box that will display a drop-down of medications based on the drug name.

You can send to pharmacy, Send to In-house pharmacy, queue to provider for sending later, save only and print prescriptions.

SENDING A PRESCRIPTION ELECTRONICALLY TO A PHARMACY

1 After selecting a patient and then a medication, you can send a prescription electronically to the pharmacy location indicated on the prescription preview window and then clicking the

 + NEW PHARMACY

button on the Prescription Preview window:

2 Click the Pharmacy drop down to  to view other preferred patient pharmacies.

3 If you want to select or search for a new Pharmacy to send a prescription to, click the  to select or search for another pharmacy. There are three different tabs of this screen that will show:

- Patient Preferred pharmacies
- Frequently Used Pharmacies
- Pharmacy Search (at top) – allows you to search for a pharmacy

The screenshot shows the 'Patient Pharmacy' interface. At the top, there is a search bar with fields for 'Store Name', 'City' (Niskayuna), and 'State' (NY), along with 'SEARCH', 'CLEAR', and 'SHOW ADVANCED' buttons. Below the search bar, there are two main sections: 'Patient Preferred' and 'Frequently Used Pharmacies'. The 'Patient Preferred' section lists four pharmacies: WEST KINGMAN PHARMACY LLC (marked as DEFAULT), Pucci's Pharmacy - Sacramento, CA, INNOVATIVE PHCY SOLUTIONS, and KROGER CENTRAL 998. Each entry includes the pharmacy name, address, phone number, and a 'SELECT' button. The 'Frequently Used Pharmacies' section lists four pharmacies: Adams Drugs (Downtown)- Montgomery, CareRx Pharmacy, City Center Pharmacy Brentwood, and CVS 16809 IN TARGET. Each entry includes the pharmacy name, address, phone number, and a 'SELECT' button. A 'CLOSE' button is located at the bottom right of the screen.
